

# AIR TIME SERVICES

- Data collection
- Backup tracking solution
- Doppler positioning (GPS-free)
- Unlimited data plan

- All Data & Voice services: SBD, RUDICS, CSD, PILOT, VOICE
- Real-time & Bi-directional solution
- Value added services

## THORIUM X IRIIDIUM TABLET

- Rugged
- Android tablet
- Integrated satellite modem
- Real-time data access

## SATCOM EQUIPMENT

- Modems
- Antennas
- Expertise

## EQUIPMENT TRACKING & RECOVERY SOLUTION

## 24/7 OPERATIONAL CENTER

### Data processing

- Decoding & QC
- Monitoring
- Data hosting & Back up

## WEB PORTAL

- Online data access
- Mapping tool
- Data usage monitoring

## DATA DISTRIBUTION

- E-mail
- FTP
- Web services
- Alerts (SMS)

## GTS PROCESSING & INSERTION

# SATELLITE TELEMETRY SERVICES

GLOBAL COVERAGE, COMPATIBLE WITH ALL PLATFORMS & MANUFACTURERS

# 30+ YEARS OF EXPERIENCE

## PROVIDING DATA COLLECTION SOLUTIONS FOR OPERATIONAL OCEANOGRAPHY

Marine & environmental scientists rely more than ever on satellite systems to collect in-situ data. New generations of instruments that produce more complex and voluminous data streams are deployed in critical areas, reporting at higher frequencies, or relying on an interactive links with remote servers for mission control.

CLS provides scientists with expert solutions to obtain this data. Being the unique ARGOS operator and a world-renowned certified Iridium VAR, CLS offers an unparalleled range of services topped by excellent support.
